

Section 1: Work Summary

Purpose This Work at Height Permit Form must be completed and approved to obtain permission prior to commencement of work at height. Work at Height is defined as whenever people are at risk of falling from, into or through one level to another.

Fall Injury Prevention Systems Fall Injury Prevention System equipment shall only be authorized as a primary control when all other control measures, including scaffolding and mobile elevated work platforms have been explored and deemed to be not practicable, and where one or more of the following systems is employed as the primary control to mitigate a fall injury event:

- Fall Restraint – Fall Injury Prevention System (preferred control);
- Double lanyard – Fall Injury Prevention System for scaffolding or when transitioning from a temporary work platform to a structure; or
- Static line used in conjunction with a Fall Injury Prevention System;
- Fall Arrest – Fall Injury Prevention System (least preferred).
